With a large 24.1 Megapixel CMOS sensor, fast autofocus, builtin wireless connectivity and more, it combines fantastic features with easy operation for high quality images you'll be proud to share. The camera's wide ISO range means confident shooting in nearly any light. It also helps you accurately see what the lens sees, even in bright sunlight. Configuration Base No matter where your next adventure takes you, count on the EOS Rebel t7s impressive 24.1 Megapixel CMOS sensor and wide ISO range of 1006400 H 12800 to capture high quality images, even in low light situations. Configuration Base To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. <http://honderhotel.com/UploadFiles/FCKeditor/20201206071525.xml>

Xena 5.0 out of 5 stars Took amazing photos on my travels to the desert and the Arches. Auto focus is great and take superb close ups. It struggles to adjust to high contrast lighting and can be slow to adjust in general. The first one had a messed up sensor on it. I sent it back to Canon for repair. It came back worse than when I sent it. They wanted me to send it to them again. HA! But, I had a ton of lenses for a Canon I cannot afford to replace, so I am stuck with one. This second one has what appears to be oil spots on the photos. I am returning it and lenses or no, I am going to purchase a Nikon. Canon and Amazon tech were unable to provide a solution to fire remote flashes except for optical trigger which doesn't work when the camera body is enclosed in a photo booth head and the build in flash cannot be used. Canon said this is a stripped down version and doesn't expect the user to require remote flash. Other than that this is a great low cost entry level DSLR camera. Everything came in one box. Small and easy to use. The two lenses gave me everything I needed to get started. I got this new updated camera for my youtube channel and I use a RODE mic attached to it for better sound quality. This is a great camera for beginners! Easy to use and is a complete set with zoom. Excellent camera for beginners and experienced alike. I bought an attachable flash for myself but it does come with one. Its good, wanted the T7i but ended up with this model. If you are getting your first dslr you cant go wrong. Sorry, we failed to record your vote. Please try again Buy this to not get disappointed. Thanks Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote.

Please try again Picture quality pretty

good.<http://dcicz.org/userfiles/instruction-manual-ipod-shuffle-4th-generation.xml>

Quite a range of settings beyond auto for those who want to take the time. Only down side for me is the one year limited warranty. Very disappointing! Sorry, we failed to record your vote. Please try again I'm still trying to figure this out. Needs a different lens than what it comes with but I'll figure it out. Sorry, we failed to record your vote. Please try again Very happy girl! Sorry, we failed to record your vote. Please try again But came in early opened and checked every thing seems to be all there and good to go. Sorry, we failed to record your vote. Please try again So far he loves it and likes to experiment with all the features it has. Sorry, we failed to record your vote. Please try again It's very user friendly and well worth the money. Sorry, we failed to record your vote. Please try again. Sortimentet med kompakta EOS M och EOS R systemkameror i fullformat ger kraften hos en spegelreflexkamera i ett kompakt kamerahus. Vi gör allt vi kan för att förutse, förbereda och minska eventuella avbrott i vår verksamhet. Vår reparationstid kan bli något längre och vi vet inte annars när vi kan återgå till vår normala servicenivå. Vi meddelar dig så snart vi har ny information. Canon IXY DIGITAL 20 IS Canon IXY DIGITAL 900 IS Panasonic Lumix DMCLX100 It can be calculated with the following formula Its slightly higher Sensor resolution is used in pixel pitch, pixel area, and pixel density formula. For sake of simplicity, we're going to calculate it in 3 stages. Its usually 1.33 43 or 1.5 32, but not always. Warranty may be either Onsite or Carry in, depending upon the Customer's location. Using counterfeit ink will harm your printer as well as render your warranty void. Description Using a small cost per print with its low capacity cartridge, the PIXMA MP287 makes for an economical printing option.

Increase your creative options by printing your favourite frame from a video that you shot with your camera using the Full HD Movie Print. Personifying elegance, simplicity, and true perfection right out of the box, the mesmerizing PIXMA Black Series makes everyday printing, copying and scanning tasks easier than ever before. The matte finish gives this printer a snug look. The scanner is top loading type Flatbed. The top panel covers the scanner bed that is built to fit an A4 sized sheet. Beside the scanner bed, you will find the 7segment LED panel which houses a soft power button and a button that allows you to choose from three preset paper sizes. The panel also has a Fit to Page button with which you can adjust the size of clipped web content so that it fits onto a single sheet of paper. This rear input tray has a capacity to hold 100 pages for you to print your favourite photos and important documents. The scanner unit opens up to reveal the cartridge bay, where the Black and Tricolour cartridges can be fit into the colour coded docks that match the colours of cartridges. The Canon MP287 all-in-one printer is an easy-to-install device. The Canon PIXMA MP287 can handle paper of A4, A5 and B5 sizes. The Canon MP287 can print your desired photo 10 x 15 in 43 seconds ensuring brilliant quality. With the hybrid ink system; create sharp and brilliant colour images with a maximum colour print resolution of 4800 x 1200 dpi. Print your Photos without sidelines on all four sides of this printer with the Borderless printing option. With Auto Scan Mode, you can directly scan the contents of the scanner bed to the PC. The Canon Printer has scan speed of 15 seconds for an A4 colour document. Scan various documents of different sizes, as this scanner houses a scanning area size of 216 x 297 mm. This Canon Pixma MP287 Printer can multicopy monochrome and colour documents up to a maximum of 20 copies of a single document.

The MP287 Canon Pixma colour inkjet printer has the ability to photocopy colour documents with a copy speed of 2.6 cpm. With the USB 2.0 connectivity option, it is easy to connect this Canon printer to a computer for printing and scanning requirements. Using the Easy WebPrint EX software, you can easily print content from websites. Quite fast printing speed for this price range. Also, the Manual is very explanatory. With manual in hand, setting up the printer is a child's play. Took me

1015minutes to set it up. Before we can use the printer, it prints 3 A4 sheets to Align the print heads. Scanning is fairly easy, and the quality is good too, as. READ MORE Karan Kohli Certified Buyer Nov, 2011 75 13 Permalink Report Abuse 5 Awesome I am very happy today just got my printer delivered by Flipkart, i have to tell this they rock super support and delivered in 3 business days exactly without any issues. Now with the printer super awesome, very easy to setup took me 15mins from installing the CD to making the printer print my first Calendar and scan some pictures. Great quality of printing, scanning and copying. Love it. Pura paisa vasool. Lol. READ MORE Pratik Jain Certified Buyer Sep, 2011 22 7 Permalink Report Abuse 3 Good multifunction printer with Foolish bugs Pros 1. Brilliant Scan quality. 2. Very good print results. 3. The softwares bundled with printer make it easy to perform various operations. Cons 1. Costlier per page printing. 2. Makes much noise 3. Takes much time for heating inks. 4. THE WORST THING When any of the cartridges is empty, YOU CANNOT PERFORM SCAN OPERATION. Its very FRUSTATING !!!! What is the relation of empty ink with scan operation!! Canon shitheads must have known this!! This fact has been mentioned in their DISCLAIME. READ MORE Rushabh Gohil Jun, 2012 30 2 Permalink Report Abuse 5 BUY IT.! I ordered my Canon PixmaMP287 on 25th November and it was delivered next day though it said delivery period is 46 days!!

Just finished installing and tried scanning and printing some docs. Let me tell you, I have been a somewhat proud owner of two HP Deskjets. And, by the initial printing and scanning, this Canon beats them hallow. I hope it continues this wayD. If anyone out there is looking for a Multifunction Printer, then go ahead and buy this one. It has amazing features with for a. READ MORE Ritesh Certified Buyer Nov, 2011 25 7 Permalink Report Abuse 2 Printing is expensive The Canon Pixma MP287 is a great MFP at this price. It has 1 Nice software support to scan and scans quickly 2 Quiet mode for working at nights less noise 3 Copy function works independently of being connected to computer 4 Decent photo printing use a good quality photo paper DOWNSIDE a Printing is very expensive the cartridges do not last long. Not for heavy printing. My suggestion to all is not to buy this printer. As far as general specifications go, it is an excellent printer. But if you check out the price of the cartridges, you will get a shock. Just buying the cartridges twice will cost you more than the printer itself. And beware, these cartridges CANNOT be refilled. If you have deep pockets, go for it. My suggestion is to always go for a printer which has refillable cartridges, like HP. The decision is yours. READ MORE Chinmoy Mitra Sep, 2012 4 0 Permalink Report Abuse 5 Great, budget, AIO printer Advantage Canon is proving their excellence in optics. They keep stand on their quality in printing tech too. Scanner produces much better result for this price range. Printing speed is excellent at standard print quality, no smudge, no wobble. Copier gives the same result at nominal speed like regu. Thanks for helping me help you! Ken. Great Lenses for Macro Any halfdecent macro lens is extraordinary for use as a normal or telephoto lens for general photography — but here Im discussing which lenses are best for serious macro shooting. With any 40mm to 60mm macro lens, by the time you get close enough for serious macro work, youre so close that you block your own light, annoy the subject, and the picture looks funny because of the unnatural perspective from being too darn close. Therefore, these will all be indistinguishable from each other as far as sharpness for serious macro use is concerned. These are so good technically that sharpness doesnt matter — but focal length does. All of these are at least as sharp, and usually sharper than regular lenses, even at infinity. See also How to Shoot Macro. See also the Comparison sections of many of these reviews for far more details. Wont work on 35mm or FX fullframe. Wont work on 35mm or FX fullframe. VR is nice handheld when used as a tele, but is of no help when shooting serious macro, which we do with strobes. They all can be used with extension tubes to get to 11 life size or more. In its day, this was the exotic dream lens of professional bug and macro photographers, but today for product shots, it doesnt do it for me with its lateral color fringes at very close distances. Wont work on 35mm or fullframe cameras. This means a grain of rice can fill a fullframe! With this lens, you cant shoot anything at any less than lifesized. It also replaces 70200mm lenses! Skip this and get the 90mm There is no 200mm macro for Minolta or Sony, so this is the best there is, with flawless optics.

Even if the optics can be as good as the others, the mechanical quality of the samples Ive seen has not been up to my standards, and there is far more potential for the lenses you buy today not to work on the cameras you buy tomorrow with these brands than with cameramakerbrand lenses. Today, youre much better off with a used manualfocus MicroNIKKOR for even less money with far superior quality, but hey, if you prefer these offbrands, dont let me stop you. It costs you nothing, and is this sites, and thus my familys, biggest source of support. These places have the best prices and service, which is why Ive used them since before this website existed. I recommend them all personally. Its great people like you who allow me to keep adding to this site fulltime. Thanks! Thank you. Please check on the Pinelabs page at the time of checkout. Please check on the Snapmint page at the time of checkout. Built with cutting edge technology, the camera allows you to shoot in multiple moods so that you can get the perfect shot in any sort of landscape while the 24.1megapixel propels your photos to the next level. The camera comes with two lenses 1855mm and 55250mm to give you stunning pictures no matter where you are. The camera is perfect for shooting a wide range of activities like nature, sports and various other such aspects while the multiple shooting modes allow you to achieve the perfect shot according to your needs. All the amazing photography features are accompanied by superfast and efficient connectivity features to accommodate easy sharing of all your captured goodness. Stunning Photography Ability The Canon EOS 1500D DSLR Camera sets remarkable standards of quality of photography. It possesses an impressive 24.1megapixel CMOS sensor that allows you to capture the most aweinspiring images. The 1855mm and 44250mm lens ensures you get detailed pictures at all times no matter where you go.

The camera also helps you to capture epic film masterpieces in fullframe full HD to ensure you capture the most smallest of details for the ultimate photography experience. Well Built Design The photography abilities of the Canon EOS 1500D DSLR Camera is designed to be very agile which makes it the perfect option for you on your adventures. The 3inch display allows you to get amazing shots and views while the battery allows you considerably long hours of shooting. To add to this, the WiFi connectivity and other connectivity features make it perfect for sharing pictures which makes it a perfect option and helps to deliver reliable and unparalleled performance. The kit also comes with a 16 GB memory card to store all your pictures while a carrying case aids in easy portability. Croma has a network of 97 Croma stores spread across 20 cities. Shopping at Croma will be a fulfilling experience giving you access to a wide range of products at competitive prices. All this comes with a great after sale service provided by an authorized 24 x 7 customer care center. Clear List.

Please expand the article to include this information. Further details may exist on the talk page. July 2020 The Aseries started as a budget line of cameras, although over time its feature set varied from lowend pointandshoot cameras to highend prosumer cameras capable of rivalling Canons Gseries. The Axx series that followed offered full manual control on most models in a fairly bulky body. The Axx series has branched off into the A5xx replaced by the A1xxx series, A6xx, and A7xx series the latter replaced by the A2xxx series. Aseries camera are generally powered by 2 AA batteries. The Canon PowerShot A60 and A70 cameras were the first digital camera models in their class to feature aperture and shutter priority, and full manual modes. More recent models generally do not support remote capture. Archived from the original on May 9, 2009. Retrieved 30 October 2009. Archived from the original on January 6, 2010. Retrieved 30 October 2009. Retrieved 30 October 2009. Retrieved 13 January 2012. Retrieved 21 March 2012. By using this site, you agree to the Terms of Use and Privacy Policy. This allows you to fit more of the scene into the photograph based on APSC format. 3. optical zoom 3.2x 1x The zoom range is the ratio between the longest and shortest focal lengths. It also provides a shallow depth of field, allowing you to blur the background to focus attention on the subject. 2. widest aperture at maximum focal length 2.8f 2.

8f With a wider aperture the sensor can capture more light, helping to avoid blur by enabling a faster shutter speed. Rounded blades, often only found on more expensive lenses, improve the appearance of the outoffocus areas. This allows you to attain better, softer looking bokeh in your photos. 4. aperture blades 7 6 The aperture controls how much light gets through to the camera's sensor. More blades is often an indicator of a better quality lens. It also allows you to achieve much nicer looking bokeh when blurring out your background, whereas a lens with less blades will often produce harsher, more polygonal bokeh. 5. smallest aperture at maximum focal length 22f 16f A

smaller aperture reduces the amount of light reaching the sensor. This is important in bright conditions where a wider aperture could result in your image being overexposed. Another advantage is that with a smaller aperture you get a greater depth of field, and can keep all of the image in focus. 6. smallest aperture at minimum focal length 22f 16f A smaller aperture reduces the amount of light reaching the sensor. Another advantage is that with a smaller aperture you get a greater depth of field, and can keep all of the image in focus. Focus 1. minimum focus distance 0.35m 0.24m This is the closest distance that the lens can focus. This is essential when you wish to take photos including far off objects, such as when shooting landscapes, in order to make sure everything is sharp and in focus. It can be assumed that most parts are interchangeable, however some machines may be modified so that supply items toner, developer, imaging, and drum cartridges may not be compatible. This system enables shooting in a wide variety of conditions, from bright sunlight to dim indoor scenarios due to ISO performance of up to 12,800, which can be expanded to 25,600. The APSC camera also has builtin WiFi connectivity with NFC that allows for wireless transfer of images and video to social networks and cloud storage via the Camera Connect mobile app. Also, NFC enables fast connection to mobile devices as well as the CS100 Connect Station. Full HD video in MP4 format is possible with the T6i in addition to stills and it has Hybrid CMOS AF III for fast, accurate autofocus during movie shooting and during Live View. Additionally, the EOS scene analysis system can detect nearinfrared light and flickering light sources to provide the best information for metering the scene. High speed continuous shooting at up to 5 fps ensures you will not miss a shot during fast action and this is benefited by the use of a 19point all crosstype autofocus system. Creative filters are also available for preset looks for your photos and videos. The EOS Rebel T6i is compatible with the full line of Canon EF and EFS lenses. An internal focusing system provides fast autofocus, and with a Stepping Motor STM and sixgroup zoom system it supports the Rebel T6i's Movie Servo AF feature for smooth and quiet continuous autofocus during video recording. Manual focus override is possible. At the core of the T6i is the 24.2megapixel APSC CMOS sensor and the DIGIC 6 Image Processor, both of which work together to produce high resolution images in a variety of shooting conditions. This is possible through a native sensitivity of ISO 10012,800, which is expandable to 25,600 for situations that demand it. Its tilt and swivel capability makes shooting at odd angles easy, and a smudgeresistant coating keeps the monitor clear. Sevenlevel brightness control is available. Intuitive touchscreen control makes menu control simple, and even offers Touch Autofocus. Full HD 1080p Video Capture.

Full HD Movie mode supports Movie Servo for continuous focus tracking of moving subjects during recording. Manual exposure control and a builtin stereo microphone with manual audio level adjustment provide highquality control over your shooting, and multiple frame rates and resolutions provide qualitylevel and stylistic shooting options. Stills can be recorded during video shooting simply by pressing the cameras shutter button. 19Point All CrossType AF System. For fast, accurate focusing in a variety of situations, the T6i features a 19point all crosstype AF system. This allows for speedy focusing performance when using the viewfinder as well as in area selection modes. Hybrid CMOS AF III. The Hybrid CMOS AF III System is utilized when shooting photos and video in Live View. Combining two different kinds of AF phase and contrast detection continuous focus tracking becomes faster and more accurate than ever before in Live View. BuiltIn WiFi Connectivity with NFC. Wirelessly transfer images and videos with the builtin WiFi connectivity of the T6i. When used with the Camera Connect mobile app users will be able to quickly and effectively upload files directly to social networking sites. Also, with NFC the camera can be paired to compatible mobile devices quickly, as well as to the CS100 Connect Station. Other Features In the Box Use single

quotes for phrases. Please, log in or register Sign up for newsletter today. Also central to the impressive specification of the EOS 550D is a highspec movie mode which offers full HD capture at up to 30 fps, manual control over exposure, and the option to use an external stereo microphone. The new camera also inherits the EOS 7Ds sophisticated metering system. Canon has pulled out all the stops with the EOS 550D and produced the most highspec Rebel weve ever seen.

It is hard to imagine how much more we might realistically expect from a product of this type, and although the improvements that Canon has made over the EOS 500D arent revolutionary, the 550D is a better camera than its predecessor. In terms of both still and video capture, the 550D is currently the best camera of its type on the market. Good for Allround use, enthusiasts looking for a bargain second body, or beginners that dont want to outgrow their camera anytime soon. Shedding some light on the sources of noise. When you purchase through links on our site, we may earn an affiliate commission. Learn more Then check out the Canon EOS Rebel T7. Although its very similar to the T6, the new model features a higher, 24megapixel sensor and some performance improvements that set it apart. At the same time, the T7s feature set is expansive enough for those who want to grow their photography skills. Editors note Canon has released the successor to the T7, the Canon EOS Rebel T8i. Unlike the T7, the T8i also has an articulating 3inch touchscreen. Todays best Canon EOS Rebel T8i deals Canon EOS Rebel T8i DSLR. It weighs 1.75 pounds with the battery and SD card and measures 5.1 x 3.9 x 3.1 inches. The grip is wrapped in textured rubber for a solid and comfortable handhold. The T7s body is otherwise mostly plastic, but the modest build quality is not surprising given the cameras price. External controls provide onetouch access to the most important shooting parameters, such as ISO, white balance, focus and drive modes. In combination with the quick menu Q button, youll rarely have to go into the full menu system. But if you do, youll find that the internal menu is logically arranged in colorcoded categories for shooting, playback and setup. Theres also a My Menu option for saving and accessing a group of up to six of your most used settings. Both the optical viewfinder and the 3inch LCD are relatively bright and clear, though the display is fixed and lacks a touch screen.
